Why Version Control (GitHub)?

- Automate OASIS Release Process

<https://github.com/oasis-tcs/odf-tc>

- **OASIS provides ODT Template** (Look & Feel)
- **OASIS receives ZIP** with Deliverables (TC Release)
 - **Problem:** Within deliverables:
Dates, OASIS Release IDs & URLs, Names changing from release version to version
 - **Solution:** Placeholders within XML fill later with data

Agile Specification (or the lack of it)

- Specification being the blueprint of software
- Problematic Time gap:
 - Agile CI/CD software release ~weekly
 - Specification release every ~18 month

Agile Specification

- Specification being the blueprint of software
- Problematic Time gap:
 - Agile CI/CD software release ~weekly
 - Specification release every ~18 month
- **Obvious solution:**
 - Generate (parts of) ODF software from specification
 - Generate (human readable) specification from basic data
 - Test documents (and future tests?) at “Spec level”
